Cycling

with the whole family – child's play

Cycle individually, or be towed

is the FollowMe motto. FollowMe is a clever parental tandem hitch that makes family cycling a safe and fun experience in an instant.

Thanks to FollowMe your whole family is on the move together having fun and always safe. Attach your child's bike to your bike for traffic situations or if they have become tired: The clever tandem hitch from Switzerland lets you react quickly to changing situations – without the need for tools! Then as soon as you feel the time is right, the youngster rides solo again.

The Swiss competence centre for accident prevention bfu bpa upi has tested FollowMe and as a result they highly recommend FollowMe for safe family cycling.

Basic Installation

You set-up both the parent's and child's bike only once by installing the special FollowMe components. For the adult's bike, this comprises a quick release skewer or spindle adaptor. For the child's bike you fit a clamp on the down tube and 2 spindle adaptors. Once this is done you can firmly connect the bikes together in no time and without tools.

Technical Details

- Children's cycles: Adjustable for all the usual sizes from 12" – 20" (age 3 – 9 years).
- Parent's cycle: Suitable for all 26" to 29" (max. 2.00 E-bikes tyres) wheel bikes. Including City, Mountain (including full suspension), Road bikes and touring bikes. FollowMe is supplied as standard with a quick release skewer. Adaptors are available for wheels with a solid spindle or hub gears.
- Material: Steel, paint coated, galvanised
- Weight: 4 kg
- Towing Weight: TUV approved up to 45 kg
- Additional load: A rear mounted child seat, pannier rack and side panniers can be used without any problems.
- Accessories: Installation sets for equipping additional adult's or child's bikes are available.

Quickly connected

You can couple your child's bike in no time and without tools or additional parts in a few short moves.

Cycling together

With FollowMe, you can transport a second child's seat and your shopping on a carrier.

Stow away FollowMe

After use and when a child is not being towed, fold up FollowMe and attach it to your pannier rack or saddle with the carabiner fastener. For cycling without children, the complete FollowMe coupling can be removed from the parent's cycle in no time.

Safe and stable

The two-point support at hub level ensures safety, ride comfort and stability because there is no leverage as with conventional supports attached to the saddle tube.

FollowMe grows

Your child and its cycle will grow – this is no problem for FollowMe. Kid's bikes from 12" to 20" can be adapted – child's age approx. from 3 to 9 years.
